

# Equality Monitoring Report: Students

The Glasgow School of Art

2018/2019

## INTRODUCTION

This report presents an overview of GSA's equality monitoring data for 2018/2019 as it relates to the protected characteristics of students on degree level programmes. Data relating to student pregnancy and maternity is not included in order to preserve anonymity given relatively small numbers.

The data for each protected characteristic is presented in a discrete section. Where data is available for the previous four years this is also included. For a longer data period monitoring reports for previous years are available at <http://www.gsa.ac.uk/about-gsa/publications/>

Programme level equality data is generated and used for programme monitoring and reporting purposes and for equality impact assessment. It is not reproduced here in order to ensure anonymity within often small cohorts, however, the collation and use of local level data underpins and informs equality mainstreaming activity at GSA alongside the overview presented within this report.

The formation of the Innovation School in 2017 is reflected in the data where a drop in the number of students in the School of Design can be noted.

Sector level benchmarking data for the year 2018/2019 will be included in this report when it is available in late 2020.

The data used in this report is that of students studying GSA degree level programmes in the UK. Data for students studying GSA programmes in Singapore (SIT) is not included.

## TABLE OF CONTENTS:

|  |       |
|--|-------|
| <a href="#">Ethnicity and Race:</a>      | p. 3  |
| <a href="#">Disability:</a>              | p. 13 |
| <a href="#">Sex and Gender Identity:</a> | p. 23 |
| <a href="#">Age:</a>                     | p. 35 |
| <a href="#">Sexual Orientation:</a>      | p. 47 |
| <a href="#">Religion and Belief:</a>     | p. 48 |
| <a href="#">Domicile:</a>                | p. 49 |

DATA SOURCES: Please note the UCAS figures have been produced from the figures reported in the End of Cycle report supplied to the School from UCAS. All other statistics are generated from internal documentation produced from the data recorded during enrolment for the period concerned and are audited by being processed via the School's HESA return.

## ETHNICITY

Data on race/ethnicity is collected with reference to the identifiers used by the Higher Education Statistical Agency (HESA) however to preserve anonymity and enable analysis these identifiers have been condensed for the purposes of this report into Black, Asian, Minority Ethnic (BAME) and White. Data on race/ethnicity is presented relative to all students and in relation to UK domiciled students only.

### Overall BAME Student Population

- In 2018/2019 26% of the overall GSA student population identified as BAME. (49% Chinese, 25% Other Asian background, 4% Black Caribbean or African).
- There has been an ongoing increase in the number of BAME students which is more evident in the student numbers, which show a 73% increase on 2014/2015 number, rather than the percentages; this may be reflective of an overall increase in student population.
- In 2018/2019, 19% of undergraduate students and 43% of postgraduate students identified as BAME. An increase of 10% in the postgraduate cohort on the previous year.
- The degree attainment gap between the total BAME and White student populations has narrowed significantly since 2015/2016 when it was 21% in favour of White students. In 2017/2018 it dropped to 7% in favour of White students and 2018/2019 saw a 0% gap in attainment.

### UK Domiciled BAME Student Population

- In 2018/2019 10% of all UK domiciled students were from BAME backgrounds. This is up slightly from 9% in the previous year.
- The number of applicants from BAME UK domiciled backgrounds has risen marginally from 8.8% in 2017/2018 to 10.2% of applicants in 2018/2019 with a 12% conversion to offer as compared to 10.5% conversion to offer for White UK domiciled applicants in 2018/2019.
- The percentage of UK domiciled BAME students studying undergraduate degrees remained steady at 9.7% in 2018/19.
- The degree attainment gap between UK domiciled students from White and from BAME backgrounds was 7% in favour of BAME students in 2016/2017. In 2017/2018 this gap was 3% in favour of UK domiciled students from White backgrounds and in 2018/2019 9% in favour of UK domiciled students from BAME backgrounds.

# Ethnicity

## DEGREE ATTAINMENT GAP

| Ethnicity (UK Domiciled) |                    |                              | Ethnicity (All) |                    |
|--------------------------|--------------------|------------------------------|-----------------|--------------------|
| Academic Year            | Attainment Gap GSA | Scotland Average             | Academic Year   | Attainment Gap GSA |
| 2018/2019                | -9%                | <i>Currently Unavailable</i> | 2018/2019       | 0%                 |
| 2017/2018                | 3%                 | TBC                          | 2017/2018       | 7%                 |
| 2016/2017                | -7%                | 13.60%                       | 2016/2017       | 2%                 |
| 2015/2016                | 18%                | 8.60%                        | 2015/2016       | 21%                |
| 2014/2015                | 5.10%              | 8.20%                        | 2014/2015       | 5.10%              |

The attainment gap is the percentage difference between first and second class, upper degrees awarded to UK domiciled BAME students and first and second class upper degrees awarded to white students. A minus (-) percentage indicates that UK domiciled students from BAME groups have received a proportionately higher percentage of first and upper second class degrees than their white counterparts.

\*\*These percentages represent the withdrawal as a proportion of the specified Protected Characteristic group in each year's respective cohort.

## DISABILITY

GSA uses the HESA disability categories for monitoring purposes.

- The percentage of GSA students disclosing a disability has been 19% over the last three years, numbers have increased slightly and the percentage of these students in receipt of Disabled Student Allowance (DSA) has also been consistent at 52% over this period.
- 22% of undergraduate students disclosed a disability and 12% of postgraduate students. The School of Fine Art continues to have the highest percentage of disabled students at 24%, followed by the School of Design with 20%.
- The number of applicants disclosing disability has continued to increase. 15% of applicants disclosed a disability in 2018/2019. The conversion rate from application to acceptance dropped marginally from 11% to 10% for those disclosing a disability and remained at 11% for applicants that did not disclose a disability.
- The degree attainment gap between students who disclosed a disability and those who did not, has narrowed from 6% in favour of students who disclosed a disability in 2016/2017 to 2% in favour of students who disclosed a disability in 2017/2018. In 2018/2019 this trend has reversed to a gap of 12% in favour of students who have not disclosed a disability.
- The number of students disclosing a disabling mental health condition (HESA Code 55) has almost doubled since 2016/2017 to 130 in 2018/2019.

# Sex and Gender Identity

## SEX AND GENDER IDENTITY

Sex identity data relates to student identification as female, male or other. The category of other includes those who associate with the terms intersex, androgyne, intergender, ambigender, gender fluid, polygender and genderqueer.

Data which specifically references gender identity indicates students who do, or do not identify, with the sex that they were assigned at birth. Trans identities are therefore represented in this data.

- The proportion of male students at GSA has continued to decline with 32% of students identifying as male in 2018/2019 a drop of 7% since 2014/2015.
- During this same period the number of students identifying as other has doubled from 16 to 35 (1.5% of the student population in 2018/2019).
- The number of male applicants rose slightly in 2018/19 with the highest number in the five-year period from 2014/2015. Conversion to acceptance rate for men and women remained broadly consistent throughout the period at just over 11% for men and for women.
- The School of Design has the lowest proportion of male students at 20%.
- In 2017/2018 a degree attainment gap between males and females opened up to 1% in favour of women and this remained the same in 2018/2019.
- In 2018/2019 the proportion of students studying at GSA who do not identify with the sex they were assigned at birth was 2%. This proportion has doubled since 2017/2018. The number of students identifying as trans has also doubled to 52 since 2015/2016.

## Sex Identity

| Academic Year    | Attainment Gap GSA | Scotland Average             |
|------------------|--------------------|------------------------------|
| <b>2018/2019</b> | <b>-1%</b>         | <b>Currently unavailable</b> |
| 2017/2018        | -1%                | TBC                          |
| 2016/2017        | 0%                 | -6.10%                       |
| 2015/2016        | 1%                 | 4.70%                        |
| 2014/2015        | -4.20%             | 5.80%                        |

The attainment gap is the percentage difference between first and second class, upper degrees awarded to female students and first and second class upper degrees awarded to male students. A minus (-) percentage indicates that female students have received a proportionately higher percentage of first and upper second class degrees than their male counterparts.

Please note these figures reflect percentages of the related cohort

This data reflects response to the HESA question: "Is your gender identity the same as the gender you were assigned at birth?"

## AGE

- The age profile of students at GSA has changed very little in the five-year period from 2014/2015.
- Variations in conversion from application to offer between age groups remain minimal over time.
- The age profile across schools is similar with only slight variations and the data for the School of Fine Art continues to show a slightly older cohort than those of the other schools.
- Attainment is broadly consistent across all age groups within GSA.
- The age group of 20 and under make up just over 30% of the total GSA student population and this has remained relatively consistent over the past five years. The same age group at undergraduate level makes up over 60% of the student population. As expected there are no postgraduate students in this age range.
- Proportionately, The School of Simulation and Visualisation has an older than average undergraduate cohort in 2018/2019 with 41% of their students aged 25 or over.
