<b>Course Title</b>	Professional Studies 5 – Exchange Out
<b>Course Contact</b>	Katherine McNeil

<b>Credits</b>	10
<b>SCQF Level</b>	Level 11
<b>When Taught</b>	Semester 2

<b>Associated Programmes</b>	Diploma in Architecture
<b>Lead School</b>	Mackintosh School of Architecture
<b>Other Schools</b>	N/A
<b>Date of Approval</b>	Programme Approval March 2024

### Course Introduction

The Professional Studio 5 (Exchange Out) course facilitates a student's command of the application of the business management and professional competencies required for contemporary architectural practice. The contractual and legislative frameworks are investigated to explore the agency of the architect and define a student's individual professional identity and potential for entrepreneurship within the profession. The wider social, political and ethical contexts are identified and their impact on the built environment and architectural practice are evaluated through reflective dialogue.

Students are encouraged to reflect on contemporary professional behaviours and practices, and to question how these can develop in the future to address the needs and desires of building users and society at large. Through consideration of ethical debates and critical analysis, students will identify their own career trajectory.

Students are encouraged to evaluate and define their position as future architects within professional and societal contexts. The agency of the architect as an advocate of professionalism and societal entrepreneur within the built environment and architectural profession is explored.

Students are taught through a combination of seminars and workshops aligned with the Stage 5 Final Design Thesis project. This forms the scenario in which the architect's relationship with clients, communities and institutional systems is explored within the global context of contemporary architectural practice.

Throughout the course students are supported to develop and demonstrate the professional competencies and graduate attributes required to meet the standards for Exemption from the ARB and RIBA Part 2 Examination in Architecture.

### Course Aims

The aims of the course are to:

**professionalism:** facilitate a student's command of the principles and practices of professionalism in terms of behaviour, business and contractual competencies, and statutory and regulatory frameworks in relation to the agency of the architect

**design/create:** facilitate a student's command of complex and coherent iterative design process informed by professional values, competencies, and statutory and legislative frameworks

**research:** facilitate a student's command of research skills informing arguments in relation the business and contractual competencies required for architectural practice supported by appropriate evidence

**communication:** facilitate a student's command of the presentation of informed arguments verbally and visually in a professional manner

**skills:** facilitate a student's command of the use of analogue and digital tools to express a student's individual professional identity in relation to a design project

**knowledge:** facilitate a student's command of the knowledge of statutory processes, competencies, the role and relationships of built environment professionals within the construction industry relative to wider social, political, ethical and financial contexts

### Course Intended Learning Outcomes

On successful completion of the Professional Studies 5 course students will be able to **synthesise, speculate & articulate:**

**professionalism:** the principles and practices of professionalism in terms of behaviour, business and contractual competencies, and statutory and regulatory frameworks in relation to the agency of the architect

**design/create:** a complex and coherent iterative design process informed by professional values, competencies, and statutory and legislative frameworks

**research:** advanced research skills informing arguments in relation the business and contractual competencies required for architectural practice supported by appropriate evidence

**communication:** the presentation of informed arguments verbally and visually in a professional manner

**skills:** the use of analogue and digital tools to express a student's individual professional identity in relation to a design project

**knowledge:** developed knowledge of statutory processes, competencies, the role and relationships of built environment professionals within the construction industry relative to wider social, political, ethical and financial contexts

### Indicative Content

Students will critically evaluate and assess the ethical and professional dimensions of architectural production. Study utilises the Final Design Thesis as the project scenario through which students define their ethical and professional perspectives, establish a practice profile and define a strategy to deliver the project.

During the course students will:

- undertake research on contemporary professional business and architectural practice
- analyse the final design thesis from an ethical and professional perspective with a focus on:
  - health and safety

- risk management
- fire and life safety design
- sustainable design solutions
- research, consider and define an individual ethical and professional position
- undertake research and establish an entrepreneurial strategy for project delivery
- present conclusions from an individual perspective, as an illustrated, written report

### Description of Learning and Teaching Methods

#### Pedagogy:

The Professional Studio 5 (Exchange Out) course facilitates a student's command of the business and professional competencies and the contractual and legislative frameworks required for contemporary architectural practice. Student learning is developed through seminars, specialist workshops, critical thinking and discussion.

#### Delivery:

The course is delivered using a range of learning and teaching activities, including seminars and group workshops along with associated specialist talks. Staff-directed study is complemented by independent student-directed study. Students are supported in preparing groupwork through briefings on strategies for collaboration and provided with example submissions.

#### Timetable:

Weekly seminars and group workshops.

#### Canvas:

The virtual learning environment tool Canvas is used for the dissemination, discussion, and access to relevant course information, and to signpost students to other relevant teaching and learning platforms used by GSA.

### Description of Formative Assessment and Feedback Methods

Formative activities are provided during the course, offering students the opportunity to obtain staff feedback. The seminars and workshops provide students with the opportunity to gain staff feedback during the workshop. Students are offered the opportunity for staff feedback on the outline of their individual written submission.

As such Formative feedback provided throughout the course fosters reflective learning while supporting the Summative graded assessment and feedback process, which generally happens at the end of the course.

### Description of Summative Assessment arrangements

Summative assessment is undertaken at the end of the course and is designed and delivered to support student learning through evaluation of the Intended Learning Outcomes (ILOs) for each course, aligned with the professional competencies required for architectural practice. Summative assessment is undertaken through an assessed group workshop and an individual 1500 word written submission. Written feedback is provided on all summative assessments.

Reassessment opportunities where a student has not passed the course are outlined in the GSA Code of Assessment.

Description of Summative Assessment Method	Weight %	Submission week
Students are required to submit an illustrated written Report (1,500 words). The Report should incorporate the group work and an individual reflective analysis.	100%	Semester 2 Week 10

Exchange/Study Abroad	
Can this course be taken by Exchange/Study Abroad students?	No
Are all the students on the course taught wholly by distance learning?	No
Does this course represent a work placement or a year of study abroad?	No
Is this course collaborative with any other institutions?	No
If yes, then please provide the names of the other teaching institutions	

Reading and On-line Resources
Supporting the course, an indicative Reading and on-line resource list is accessible via Keylinks. This list will be reviewed and updated annually. Supervisors, tutors and peers will provide further recommendations appropriate to student's chosen research subject.
